

Carbon Foot printing Guide

Nedbank has recently completed writing the Carbon Foot printing Guide. This will be used as a textbook at Stellenbosch University's Sustainability Institute, Pretoria University and a growing amount of other institutions. It is also intended for individuals and businesses to acquire the relevant skills to calculate and analyse a carbon footprint. The Guide was sponsored by Nedbank and will be freely distributed either in hard copy or downloaded as a PDF.

Below is the link to the Guide:
